## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 March 2009 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, claim 1 now states that the outer surface of the spline, which originates from and extends radially inwardly from an innermost peripheral surface of the sprocket, faces that very same innermost peripheral surface of the sprocket. This limitation does not appear to be possible, as it

Art Unit: 3657

is not clear how a surface facing radially outward can also face the innermost surface of the same sprocket body.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-12, 15, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Kamada et al. (2004/0142783).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e).

In Re claim 1, Kamada et al. disclose a bicycle sprocket comprising: a sprocket body (F); a plurality of teeth (G); a spline (224) that originates and extends radially inwardly from an innermost peripheral surface (212,C) of the sprocket body that forms an adjacent radially outwardly extending spline (232), wherein the spline terminates in a radially inwardly facing free end (A); wherein the spline includes a radially outer surface (B) facing radially outwardly.

In Re claims 3 and 4, see fig. 3(B).

In Re claims 5 and 10, see first sidewall portion (F), and second sidewall portion (H).

In Re claim 6, see fig. 3(A).

In Re claims 7 and 8, see fig. 3(B).

In Re claim 9, see (A) and (E).

In Re claims 11 and 12, see fig. 3(B).

In Re claim 15, see fig 3(A) and surfaces (B) and (C).

In Re claim 16, the sprocket is one-piece.

### ***Allowable Subject Matter***

Claims 13, 14, and 18 are allowed.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 3-12, 15, and 16 have been considered but are moot in view of the new ground(s) of rejection.
